 # Here are the steps to accomplish the task-1 Of Create a GIT Repository :

1. **Create a GIT repository:**

   - Go to GitHub and create account on that website.
   - Created a repository named as my Enrollment No. which is "2201031800024".
   - Navigate to the directory where you want to create your repository.
   - If u want then you can public or private your repository and also you can choose README file , add gitignore and you can choose license also.

2. **Create folders for Assignments:**

   - Inside this repository directory, created two folders named as `Assignment_1` and `Assignment_2`.

3. **Verify folders creation:**

   - After created these two folders in my repository, first I uploaded my file into Assignment-1 folder, that is DIY website layouts which was designed in Figma.
   - And after this I uploaded file Into Assignment-2 folder, that is my domain website which is DIY home projects.
